Parent & Child Aquatics - Preschool Aquatics - Learn to Swim – Adult Swim Programs

The 4 programs listed above represent the most current programs offered by the Red Cross to teach people water safety and swimming.
American Red Cross Parent and Child Aquatics (2 levels) is designed for children between the ages of 6 months and approximately 3 years, and their parents. The purpose of the course is to familiarize children with the water and teach swimming readiness skills. In addition, Red Cross Parent and Child Aquatics provides safety information for parents and teaches parents techniques they can use to help orient their children to the water.
American Red Cross Preschool Aquatics (3 levels) is designed for children approximately 4 and 5 years of age. The purpose of the course is to facilitate developmentally appropriate learning of fundamental water safety and aquatic skills
The objectives of the American Red Cross Learn-to-Swim courses (6 levels) are to teach children to be safe in, on and around the water and to swim well. Aquatic and personal water safety skills are taught in a logical progression through six levels. Participants in Level 1 are oriented to the aquatic environment and gain some basic skills in each category. As they progress through the levels, participants build on their basic skills to learn and refine various propulsive movements on the front, back and side. On successful completion of Level 3, participants have achieved basic water competency in a pool environment. By the end of Level 6, participants have the prerequisite skills and have developed the necessary skill and fitness levels for entrance into advanced courses, such as Water Safety Instructor and Lifeguarding, or other aquatic activities such as competitive swimming and diving
