#### DID YOU KNOW THAT ACCORDING TO THE CDC

- ★ More children ages 1-4 die from drowning than any other cause of death.
- ★ Drowning is the second leading cause of unintentional injury death for children ages 5-14.
- ★ Every year in the United States there are over 4,000 unintentional drowning deaths.

**LEARNING WATER SAFETY AND LEARNING TO SWIM CAN REDUCE DROWNINGS & NEAR-DROWNINGS.**

**ADVANCED SWIMMERS (LEVELS 4, 5 & 6):** NOTE: We are encouraging all students who have completed the Red Cross Learn-to-Swim levels 4 - 6 to consider the Warren Harding Aquatics Team (WHAT) program. Due to limited available times and staffing, these levels may not be offered in our Red Cross program at this time. WHAT participants do not need to participate in competition but will still learn 4 basic swim strokes and other skills that are taught in the Red Cross program. If your child is working on LTS Level 4, check with Jay for recommendations. (For WHAT information contact the head coach, Michael Davidson. See contact information below.)

**IN-WATER CAREGIVERS:** While not currently required, in-water caregivers are still being RECOMMENDED with children in Preschool (PA) and LTS Level 1 classes especially with those who are unable to stand safely on the platforms. For new younger preschoolers we recommend that a caregiver be ready to go into the water on the first day "just in case" there might be a problem.

**CORRECT LEVEL:** If you are unsure of the correct level and your child has been taking lessons within the last year or so, we will know the correct level. If you are unfamiliar with the names of the strokes & skills, you might also check on Google or YouTube. In-Water screening may also be available if your child is new to us or has not been participating with us for a while. CHECK PAGE 3

**SUGGESTIONS TO PARENTS:** Parental support and patience are an important part of your child's progress in learning to swim as with other activities. Each child will progress at his own rate. Some children may be anxious and even fearful. Some children may "plateau" in their progress needing to repeat the same level multiple times. Some children may have difficulty learning with a group and need 1:1 instruction. Understanding the reason your child is not progressing is important. Take advantage of the Parent resources provided by the instructor. Avoid making comparisons to other children. Talk to the instructor.
